

**World Triathlon Paratriathlon Medical Diagnostics Form
for athletes with physical impairment**

The form is to be completed in English by the athlete’s individual medical physician and submitted in advance to World Triathlon for preliminary check and validation.

This applies to all athletes with physical impairment intending to compete in Paratriathlon. Depending on the athlete having a permanent underlying health condition that leads to an eligible impairment type, additional medical information is to be attached to this form (see page 2).

Athlete Information

Last name: _____
First name: _____
NF/NPC: _____
Gender: Female Male Date of Birth: _____
Sport: _____
Years/months competing in the sport at national level: _____

Medical Information

Description of the Athlete’s Underlying PERMANENT Health Condition and medical diagnosis and the loss of function produced by this health condition:

Health condition is: progressive stable

Medical history:

Health condition is: acquired congenital

If acquired, age of onset: _____

Anticipated future procedure(s): _____

Medication:

Attachments

The athlete's underlying health condition as stated on this form and the resulting impairment must fully explain the loss of function exhibited by the athlete during athlete evaluation. Otherwise, classification cannot be completed, and no sport class can be allocated by the classification panel, as stipulated in the World Triathlon classification rules.

Therefore, additional, recent and relevant medical documentation has to be attached to this form if the athlete has:

- an impairment or diagnosis that cannot be ascertained by clear signs and symptoms;
- a complex or rare health condition, or multiple impairments;
- limb deficiency (amputation or dysmelia) at the level of an ankle, knee, wrist or elbow joint (X-rays for the respective joints to be enclosed);
- a spinal cord injury (recent ASIA scale results to be enclosed);
- one of the neurological related impairments ataxia, athetosis or hypertonia (Modified Ashworth Scale scores to be enclosed).
- Multiple sclerosis: EMG/MRI (please refer to Classification Rules Appendix I section 3.9)

Reports on additional testing by physicians, physiotherapists and other health professionals are welcomed, where relevant, to complement the medical diagnostic information.

World Triathlon and the Classification Panel may ask for further information to be submitted depending on the individual athlete's health condition and impairment.

<input type="checkbox"/> I confirm that the athlete's information on page 1 is accurate.	
<input type="checkbox"/> I confirm that the athlete meets one or more of the IPC Eligible Impairment Types:	
<input type="checkbox"/>	Loss of muscle power
<input type="checkbox"/>	Loss of Range of Movement
<input type="checkbox"/>	Limb Deficiency
<input type="checkbox"/>	Hypertonia
<input type="checkbox"/>	Athetosis
<input type="checkbox"/>	Ataxia
<input type="checkbox"/>	Loss of Vision
