Sustainability

The world we are living in is changing rapidly. Industrial and economic progress has come at a great cost to the planet, but it is not too late to make decisions and take actions that can halt the damage done to our environment and stem the tide of global warming.

It is in the very nature of our duty as the governing body of one of the world's fastest growing sports that World Triathlon reaches all corners of the globe. We host large-scale events in major cities attracting thousands of participants and even more spectators. We now know the impact that daily occurrences such as global travel and the use of plastics has on our planet, and we want to become a leader not just among fellow International Sports Federations, but global organisations of all kinds, in taking action and encouraging our stakeholders to do likewise.

As part of this approach, World Triathlon has introduced the [World Triathlon Sustainability Guide for Event Organizers](#). This document is an invitation to our event organiser partners to engage in the journey of social, economic and environmental sustainability within the delivery of their event.

Some are already engaged, either on a voluntary basis or due to local legislation, and others have not yet started. Regardless of your location on this journey, this document offers a non-exhaustive list of actions to help keep you moving into the direction of sustainability.

It will also serve as a framework for a World Triathlon Sustainability certification system, which will recognize the commitments of LOCs to minimize their footprint..
