SECTION A:

**OVERVIEW OF THE SERIES
& THE MANAGEMENT TEAM**

1. INTRODUCTION

- 1.1. The World Triathlon Championship Series (World Triathlon Championship Series) brings together the world's premier triathlon events. The series is wholly owned by the World Triathlon, the world governing body of the sport. World Triathlon will use its highly experienced staff to support each Local Organising Committee (LOC) in delivering a world-class event. World Triathlon will provide key operations staff to support the event (outlined below) during its operation.
- 1.2. The World Triathlon Championship Series is developed in collaboration with various stakeholders which will partner with World Triathlon in producing the series, forming a professional and highly experienced Series Management Team (SMT).
- 1.3. The Objectives of the Series Management Team (SMT) are:
 - a. To form a management partnership with the Local Organising Committee (LOC) and the Host City (HC) and support the LOC in reaching the world-class standards consistent with each event in the series;
 - b. To collaborate closely with the LOC, the National Federation (NF) of the country and the Host City (HC). In addition to this document, the World Triathlon Event Organisers' Manual, the World Triathlon Championship Series Branding Guidelines will be used as a working document by the LOC and include all the necessary additional information to deliver the event details. Executing the details is a matter of agreement with World Triathlon, the Team Leader (TL) and the World Triathlon Technical Delegate (TD). All documents can be downloaded from www.triathlon.org;
 - c. To ensure the LOC complies with the World Triathlon Competition Rules.

2. THE PRINCIPLES OF WORLD TRIATHLON CHAMPIONSHIP FINALS

- 2.1. A safe and fair environment for the athletes;
- 2.2. High quality events with consistent technical standards and brand consistency i.e. 'Look and Feel';
- 2.3. Spectacular events showcasing the city through media exposure and significant spectator audiences;
- 2.4. Deliver to a worldwide audience through live television, highlights shows and other media;

- 2.5. Opportunity to bring international visitors to the host city;
- 2.6. Deliver high quality opportunities and total satisfaction to sponsors;

- Historic statistics/results (World Triathlon statistics are available in the Online Media Centre <http://media.competitions.org>. (Please contact World Triathlon if you require a sample Press Kit. The World Triathlon Media Guide and the World Triathlon Championship Series Media Guide are available on the World Triathlon Media Centre <http://media.competitions.org>).

2.13. Equipment and Logistics Requirements:

- The LOC must provide two motorbikes with drivers and helmets for the official World Triathlon photographer and pool photographers. Any additional motorbikes for local media access are the responsibility of the LOC and all vehicles on course must be approved by the World Triathlon Technical Delegate.

2.14. Reporting:

- The LOC must provide a list of all accredited media to the World Triathlon at time of arrival;
- The LOC must provide a detailed reporting document to the World Triathlon Media Manager within 4-6 weeks after the event. This document will include:
 - Detailed Pre and Post Monitoring information (clippings, local TV stats, etc.);
 - Final Media Contact list;

3. TIMING AND RESULTS SERVICE REQUIREMENTS

3.1. Overview:

- Timing and results services are the cornerstone of a successful broadcast from a World Triathlon Championship Series event. These services are the basis for a professional and accurate production of a live Broadcast signal. As a result, the following are the technical requirements for any timing company that wishes to provide basic timing and results services. Please note that it is the responsibility of the LOC timing company to fulfil these requirements in full.

- b. **IMPORTANT:** The LOC should ensure that the proposed timing company for the event can meet these requirements. An LOC timing and results provider **CANNOT** be confirmed until they are approved by the SMT.

3.2. General requirements:

- a. The event must select a partner – the Service Provider – to secure the required quality of basic timing and results service.
- b. The Service Provider should work on a “near invisible” basis during the event, with absolute minimum presence on the event course.
- c. The Service Provider must be able to produce data displaying the results of the event, including each individual leg (swim-T1 –bike-T2 –run), and with multiple splits during each leg, where course layout allows.
- d. The Service Provider must provide a direct connection to the graphics company to provide the basic timing service data.
- e. Where possible, timing systems must be hidden from media, Broadcast and photographers.

3.3. Timing System:

- a. Requirements of the transponder system:
 - The transponder timing system has been used on World Triathlon Championship Series events before, or has continuous references on World Triathlon Cup events in the last 3 years without problem.
 - Active chip technology or World Triathlon approved technology. Non World Triathlon approved transponder timing systems are not allowed.
 - Reliability, nearly 100% detection rate - so all times are captured without losses;
 - Able to capture all splits for each individual leg, including multiple splits on swim (on water exit), bike and run;
 - Attach the transponder to the athlete in an ankle band; in a manner that does not influence the performance of the athlete. A second transponder is suggested onto the other ankle to avoid the negative effect of athlete transponder lost on swim course.
 - Work under the regulations of CE and FCC;

- Weigh no more than 20g;
- Transponders have to be provided for the athlete lounge in envelopes with athlete number and category (e.g. Elite Men, Elite Women) information on the envelope.

- b. Deliver the transponder data live and in real time from all splits (including intermediate ones) into the timing and results software used by the Service Provider;
- c. Able to vary in width from two to eight metres without obstructing the course, the thickness of the detector loops should be 6 mm maximum.

3.4. Use of Timing System:

- a. Timing systems should be installed so as to isolate each discipline (swim, transition one (T1), bike, transition two (T2) and run) and capture multiple split times during each leg also (if athletes exit swim after each lap and if athletes lap through transition area during the bike and the run) and provide backup lap counting on the bike and run segments. The following timing data is required:
 - Swim intermediate times;
 - Transition 1 times;
 - Bike lap times;
 - Intermediate bike lap times (systems should be placed in coordination with Broadcast Camera plan to give updated data for Broadcast graphics during each lap); Please consult the Broadcast Production Director.
 - Transition 2 times;
 - Run lap times;
 - Intermediate run lap times (systems should be placed in coordination with Broadcast Camera plan to give updated data for Broadcast graphics during each lap); please consult the Broadcast Production Director.
 - Finish time.
- b. The Service Provider must have live real time connections to timing locations to pull or retrieve data with as minimal latency as possible. World Triathlon emphasizes use of direct cable connections to the timing locations, and definitely avoiding WiFi or cellular connection on the venue..

- c. On locations where this is not possible the Service Provider must aim at using internet-based connection via DSL or cellular connection in that order of priority.
- d. IMPORTANT: Manually transporting times via a USB stick or similar device is not allowed;

3.5. Software:

- a. The Service Provider software must be able to receive transponder data live in real time from the locations of the timing systems.
- b. The captured data will be accessible in real time with direct access to the data provided to the Broadcast Graphics company, connection details to be provided by Broadcast Graphics company;
- c. Additional information coming from the Field of Play will be included manually by the Technical Official e.g.: DNS, DNF, LAP, DSQ, penalties information.
- d. World Triathlon requires World Triathlon Live Timing API export to facilitate live timing coverage on World Triathlon web services.
- e. Test sessions are required which include timing, results, link with live timing and link with Broadcast graphics two weeks prior to the event remotely and the day before on site.

3.6. Event Venue Services:

- a. The timing provider should be able to provide an Intranet CIS (Commentator Information System) capable of connecting to various feed points such as Sport Presentation booth, TV Commentator cabin, OB Van.
- b. Physical printouts of all relevant data (e.g.: start lists, official results) are also required.
- c. The timing provider should be able to deliver updates via SMS and mobile technology if requested.
- d. The timing provider should provide a gantry finish clock or LED screen capable of displaying time and athlete data such as name, nationality, category etc., an electronic lap counter and scoreboard capable of graphic display.
- e. A printed results (as per Competition Rules) distribution procedure should be able to be delivered.
- f. At least one FOP operator is required to:
 - Manage last minute chips replacement

- Backup the start signal
- Identification of chipless athletes

3.7. Official Results Service:

- a. Official results should be made available in a timely manner in formats as specified by World Triathlon including detailed race analysis. Exports in various formats should be possible to relevant third parties (media, event officials, IT partners etc.). Any photo-finish images should be available instantly for event officials, media and Broadcast partners.
- b. As from 2023, official results should be automatically submitted through the live timing API (<https://developers.triathlon.org/page/live-timing-standard-v11>) where the API has been integrated. To do this, please send a single JSON timing message with the status set to "official", once results are approved and signed off by the Head Referee.
- c. In case sending results via API is not possible, an Excel file must be produced with the following information:
 - Event Information such as: Event Name, Event Data, Start Time, Event Officials, Event Distance, Course Data and Weather Information;
 - Rank of athlete;
 - Race number of athletes;
 - Name of athlete;
 - National Federation of athlete;
 - Swim time + Rank on swim leg;
 - 1st Transition time + Rank on 1st transition leg;
 - Bike time + Rank on bike leg;
 - 2nd Transition time + Rank on 2nd transition leg;
 - Run time + Rank on run leg;
 - Total time;
 - Time offset to winner;

- c. Two photo finish cameras must be provided and positioned on either side of the finish Gantry and an official finish line must be marked for the decision of the final result. Mounting the cameras onto the finish gantry scaffold is preferred than using tripods.
- d. For close finishes, the Service Provider must be able to export the picture immediately according to a previously agreed communication protocol to the host broadcast company and World Triathlon Media team.

3.11. Basic Broadcast Graphics Services:

- a. The timing and results services provider is required to feed data containing:
 - Environmental information gathered from TOs;
 - Intermediate standings during and after the different splits/laps taken on the different legs’;
 - Intermediate standings during and after the different legs (swim / transition / bike / transition / finish);
 - Race incidences, IRMs and penalties
 - Final results.
- b. The timing and results services provider is required to feed this and work together with the Broadcast graphics company used by the Broadcast production company at the event. This data must be available to the Broadcast graphics company in either a push or a pull protocol. The timing and results services provider must be able to send data over the following methods of communication: TCP/IP
- c. The timing and results services provider is required to continuously review data before release to the Broadcast graphics company throughout the event, as is requested to have a dedicated person for this purpose. From athlete passing to release of standings information this must be in real time, unless an otherwise distributed plan has been agreed between the timing and results services provider and the Broadcast production company.
- d. Details on additional features should be laid out in the proposal, such as information on:
 - Athlete information request;
 - Competition environment request;
 - Results analysis;

- The timing and results services company should arrange the transfer of timing data to the graphics provider, with consultation to the LOC and Broadcast production contacts listed below in Section E;
- Where possible within the range of networking with cable, a direct cable connection must be used for communication between the timing and results services provider and the Broadcast graphics company. Where this is not possible, the optimum solution with either internet or wireless should be carefully considered by the two parties.

3.12. Notes:

- a. It is the responsibility of the local timing company / service provider to ensure that there is a working interface to the graphics provider.
- b. The LOC timing company must provide one contact person from their local timing company to coordinate the protocols in use and the technical requirements of the Host Broadcast Company (HBC).

4. BROADCAST REQUIREMENTS

Please note that this section related directly to World Triathlon Central Production. All questions should be directed to the Central TV Production.

4.1. Preamble:

- a. The World Triathlon Championship Series is the premium product of World Triathlon. In order to establish the series on a worldwide basis it is necessary to have a consistent high quality TV product. World Triathlon defines the TV product as a combination of live races and news distribution. All this will be offered to international broadcasters.
- b. World Triathlon will provide a host broadcaster (HBC) for the event. The HBC will be obliged to produce a TV signal of both races (elite men and elite women) for national and international broadcast partners.
- c. The LOC will be required to deliver the onsite infrastructure for the HBC. Space, power, internet, structural facilities such as containers, cable bridges/jackets, fencing etc.
- d. The LOC will provide a domestic broadcast taker for the series by 31 October of the year prior. If no domestic taker is secured by this date, the rights revert to World Triathlon to secure broadcast for the event and the series. World Triathlon (through its media partner

Infront Sports & Media (Infront Sports & Media & Media) will deliver International broadcast takers.

4.2. Production:

- a. While the Host Broadcast is fulfilled by World Triathlon this section serves as a general guideline for LOC's can expect from the broadcast production. It is well acknowledged that this document can only give general statements related to the coverage of the World Triathlon Championship Series. Detailed discussion with the proposed HBC is required before a final decision is made and adjustments to these requirements may have to be made depending on the course and other local circumstances. The final set-up will be determined after a site survey with the LOC, HBC and World Triathlon.
- b. The host broadcaster will be obliged to produce a world class live feed of both the Elite Men's, Women's & any associated Mixed Relay races. It will be responsible to deliver all equipment and manpower necessary for such coverage from the venue.
- c. Any final camera plan and other local settings are subject to final approval by World Triathlon.
- d. The normal obligations of an HBC such as on-site coordination for licensees present in the venue should be fulfilled by the HBC too.
- e. The HBC will make available the feed to World Triathlon and licensees at the venue or a prior agreed international gateway.
- f. The feed will be produced in the following format: High Definition 1080i/50Hz (or High-Definition 1080i/59.94Hz).
- g. The HBC will be ready to start the Feed at least two (2) hours prior to the Event.
- h. Two digital drive recordings (more upon request) (one clean/clean and one PGM with international sound) will be supplied to World Triathlon.
- i. Upon prior consultation of the HBC, World Triathlon will determine the final set-up and the edit flow, the use of graphics, statistics and timekeeper. World Triathlon reserves the right to bring its own director and part of the camera crew for each production and will be entitled to use the technical means provided by HBC. Any final camera plan and other local settings must be approved by World Triathlon.

- j. World Triathlon will provide a Live Producer in charge of the editorial treatment of the event, good usage of the graphics guidelines and delivery of the international running order for each WTCS event.
- k. The feed must be completely neutral and independent and free of any domestic elements.
- l. The feed will be accompanied by full international sound in stereo quality and will cover in full, all the action from the event.
- m. Infront Sports & Media will provide two English commentators whose audio must be implemented into the feed by the HBC. Commentary may be produced off-site as deemed appropriate by World Triathlon.
- n. World Triathlon will hire a provider for TV graphics whose services must be implemented into the OB production and used for the International Feed.
- o. The HBC will implement the official opening and closing sequence provided by World Triathlon and will implement clips, profiles, vignettes, and features about athletes, the venue and the track (virtual / animated), the city and other relevant content promoting the World Triathlon, the event and the location at the reasonable discretion of Infront Sports & Media.
- p. The HBC will implement on World Triathlon's behalf and at World Triathlon's reasonable discretion sponsored graphics (e.g. a branded clock or data). The TV graphics provider will supply the equipment to collect the GPS data and graphics computer or caption generator to implement it into the Television Signal (e.g. Viz RT or similar). HBC will offer all necessary assistance and cooperation to connect the equipment to HBC's OB unit and deliver all necessary supplies for the graphic workplace such as a working container with air conditioning, tables, chairs, power supply, an Internet connection, all cabling, etc.
- q. The LOC support for TV includes the provision of certain space and facilities within the venue and course for the HBC and any International Broadcasters with unilateral on-site presence, as well as other positions to observe proceedings to ensure consistency across the event.

4.3. Interview TV room:

- a. A TV interview room of minimum 20m² should be set up the day of the Athletes' briefing (working place for 6 people and 4 extra chairs.)
- b. Electricity and free Wi-Fi internet access is required. The room should be in a quiet environment and have the possibility to turn the lights off.

c. Sealed water bottles are required for the athletes.

4.4. Coverage outline:

- a. The International Running Order for the live coverage of the elite event will be provided by HBC.
- b. Triathlon is determined by the challenges of three different sports each having its own specific requirements for TV coverage and possibly taking place in different environments. The following will give a short outline of what we consider crucial scenes in each of the disciplines. For each of these scenes the host broadcaster will make efforts and ensure the best possible coverage, use the best suitable equipment and the best positions for camera equipment. Upon request World Triathlon will provide video examples of ideal live coverage from a previous event.

4.5. Audio:

- a. Infront Sports & Media expect (directional) microphones on each camera and at each crucial point of the coverage:
- Exit from swimming
 - Transition zone to cover fast passing bikes, steps, atmosphere of spectators
 - Finish line
 - At location of specialty cameras

4.6. Equipment to be used: For the described coverage we expect the following list of equipment as follows:

Description	Minimum Number (possibly higher depending on venue):
OB Truck	1 unit, with hard disk slow motion systems
USB recorder	2 x USB + UBS stock
Helicopter with WESCAM	1 x with Bi-Turbine
RF coverage	Best endeavour to provide uninterrupted RF signal for the entire race, e.g. pressurized RF relay plane. System to be validated by World Triathlon before deployment.

SECTION E:
WORLD TRIATHLON
CONGRESS AND MEETINGS

1. WORLD TRIATHLON CONGRESS

1.1. The World Triathlon Congress is one of the most important events for World Triathlon and its members, the National Federations and the Continental Confederations as well as for the members of the World Triathlon Committees and Commissions. The World Triathlon Congress is scheduled to coincide with the World Triathlon Championships Final. It requires a significant level of support from the Local Organizing Committee. The below outlined requirements need to be provided and paid for by the LOC unless mentioned otherwise in the table. All meetings, offices and Congress should take place in the same location, ideally in the host hotel. The Congress is the highest level governing body of the World Triathlon, together with meetings of the World Triathlon Continental Confederations, World Triathlon Executive Board, World Triathlon Committees and Commissions, among others.

a. Meeting rooms:

- World Triathlon Congress Room Technical, Audiovisual Equipment and volunteer support: (refer to table below)

b. Accreditation:

- The LOC will produce the accreditations for the Congress delegates with name/photo, which will be valid as a VIP access for each during the competitions and social functions.

c. Accommodation:

- The LOC should be able to propose a price up to a maximum of 90USD/ per night for NF delegates accomodatoin (1 per NF – 166 NFs).

d. Carbon Neutrality:

- All relevant greenhouse gas emissions of the World Triathlon congress and meetings, including the emissions of the infrastructure (power consumption, heat energy, refrigeration), participant travel to the event, catering and lodging for the participants, and event-specific materials and waste have to be calculated, reported and offset in a certified compensation project.

e. Hybrid Meeting options: In case travel is not possible from all member countries, the meetings and the Congress may take place in hybrid format. The necessary technology requirements (screen, camera, microphone) for such solutions is the responsibility of the LOC.
